

supply further details. However, there are other sites available within the county.

Of the approximately 1500 acres of industrial land shown on the Development Plan Map, only 350 acres are presently being used for industrial purposes. The remaining 1150 acres of industrial land will provide a wide variety of sites for new industries.

Public and Semi-Public Development

New development of public or semi-public land uses will be very limited in the next twenty years outside of the existing urban areas. Most of the county's future public development will be county schools and parks and recreation areas. However, the City of Goldsboro, in its recent Land Development Plan and Community Facilities Plan, has a park and recreation plan which extends outside of its corporate limits. This plan integrates parks and playgrounds with schools sites for maximum use. This plan also depends heavily on the development of Stony Creek as a watershed project. More detailed information can be obtained from Goldsboro's Plan.¹

The County school system is in a definite transition period which will bring many changes in the next 20 years. In the 1966-1967 school year, Wayne County schools had approximately 12,000 students enrolled while 8,400 were enrolled in Goldsboro schools. The Economic Potential Study for Wayne County
